

# M01-Mesh Portable Base Station

## Support Live Transmission in Distant and Poor 4G Area

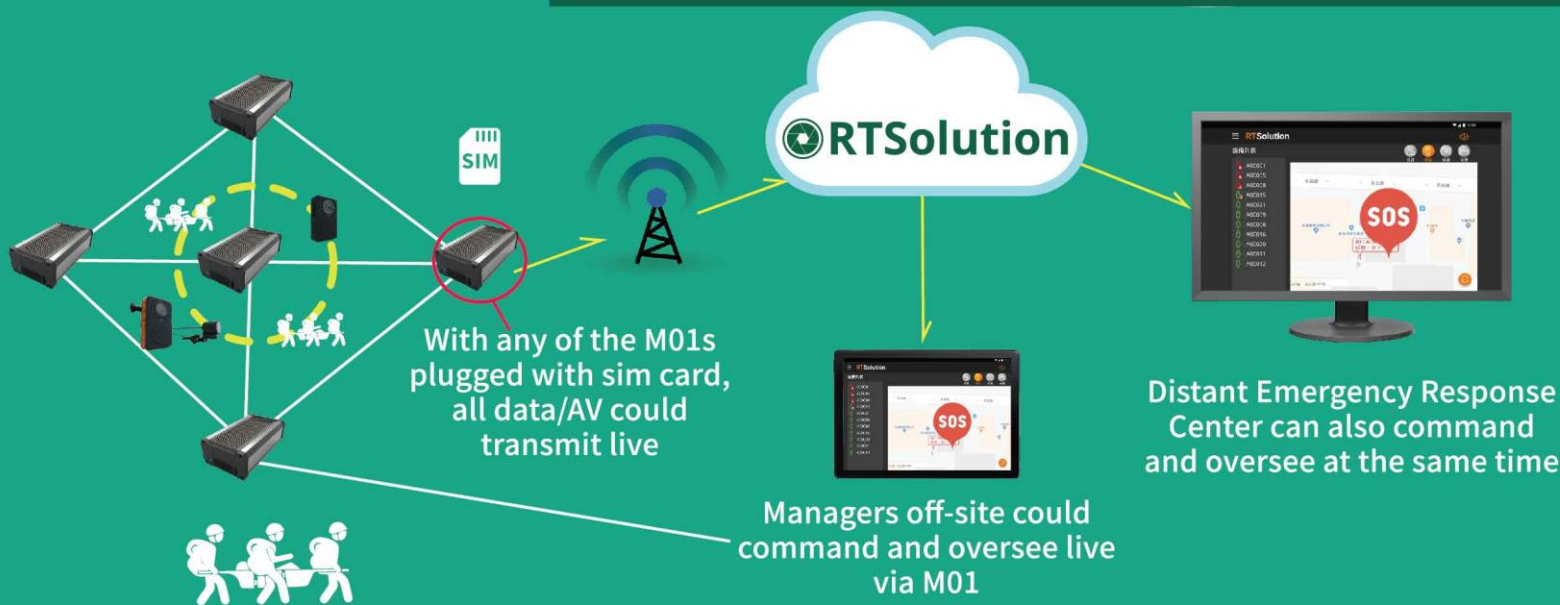

Enable RTS-F01 to achieve all in one feature even if poor 4G/without 4G. Mesh network forms up a local area network that enables every device to communicate within. With one of the M01 connected to 4G, distant activities can still be achieved on live.

### Situations

Mountain Top, Basement, Sewer, etc. Where Has Poor 4G Connection

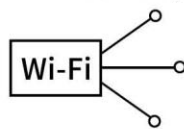

Personnel are equipped with M01s while entering the site

## Without 4G, transmission can still be realized in intranet.

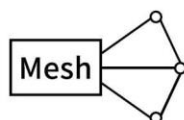

Different from WiFi, Mesh creates a better network

Wi-Fi Router(Tree)

Mesh(Cellular)

- Anti-Noise
- Devices Roaming Within the Network
- Connection to Public 4G
